

## Ayrton Senna – Memories and mementoes from a life lived at full speed

Ayrton Senna and Michael Schumacher remain two of the most-written about figures in Formula 1, and it's little surprise that many F1 fans' bookshelves simply swell with books about these two giant protagonists of the sport.

The late Christopher Hilton – a renowned F1 journalist who wrote several Senna books – has put together this very interactive biography on the three-time World Champion, which was published ahead of the fifteenth anniversary of his death. This is a biography with a difference.

For the first time, the family of Ayrton Senna has opened its archives, sharing more than 200 never-before-published photographs.

These treasured memories form a focal point around which relatives talk about what he was really like. Their words are woven into a compelling new narrative by Christopher Hilton, who has also used new interviews with people who knew Senna to create an intimate portrait of the man and his career. 'Pockets' throughout the book contain facsimile items of memorabilia such as his birth certificate, a school report, racing licence, contract documents and personal letters.

**Ayrton Senna - Memories and mementoes from a life lived at full speed** is available from [www.motorbooks.co.za](http://www.motorbooks.co.za) for R630,00.
